

TITLE: ABZ Innovation & PIX4D Join Forces to Revolutionize Precision Agriculture with Drone Technology and PIX4Dfields

Subheadline: *The new partnership integrates PIX4D's advanced photogrammetry software with ABZ Innovation's agricultural drones for precise variable rate applications.*

Date: 21. 04. 2026

Location: Szentendre

ABZ Innovation, a leading developer of agricultural drone solutions, has announced a groundbreaking partnership with PIX4D, the global leader in photogrammetry software. This collaboration combines PIX4D's advanced mapping technology with ABZ Innovation's agricultural drones, bringing enhanced precision to variable rate applications (VRA) in farming.

With the integration of PIX4Dfields, farmers using ABZ Innovation's drones will now be able to import highly accurate, customized field data for real-time, variable rate applications, ensuring precise spraying, seeding, and other operations with minimal waste. The software creates high-precision shapefiles that can be directly imported into ABZ Innovation's drone systems, enabling seamless, automated VRA across diverse fields.

"We are excited to partner with PIX4D to enhance our drone solutions for precision agriculture," said Károly Ludvig, CEO at ABZ Innovation. "This collaboration provides farmers with an efficient, cost-effective solution to optimize their operations and improve crop yields."

This partnership also supports a range of drone models, allowing farmers to use PIX4D's mapping software with their existing drone fleets, including products from different manufacturers, such as DJI, alongside ABZ Innovation's own drones.

Together, ABZ Innovation and PIX4D are empowering farmers to make smarter, data-driven decisions that improve productivity and sustainability in agriculture.

About ABZ Innovation

ABZ Innovation is a European developer and manufacturer of heavy-duty agricultural and industrial drones and accessories for mission-critical operations. Built for spraying, spreading, cleaning, and specialized industrial tasks, ABZ

systems prioritize reliability, serviceability, and predictable performance. Operating in 40+ countries through a global distributor and service partner network, ABZ Innovation is backed by its CEO and CCO, along with private individuals, investors, and a University — and is positioned as an emerging leader in professional drone automation.

About PIX4D

PIX4D is a global leader in professional reality capture and site-digitization software, providing an end-to-end ecosystem for capture, processing, and collaboration across mobile, desktop, and cloud applications. Headquartered in Switzerland, with offices in the USA, Germany, Spain, Romania, and Japan, the company develops solutions that transform images into survey-grade georeferenced 2D maps and 3D models.

PIX4D focuses on bringing high-precision data capture and processing across surveying, construction, energy and utilities, and agriculture through seamless field-to-office workflows. By providing a clear visual record and measurable site data, PIX4D enables professionals to monitor projects, verify accuracy, and make data-driven decisions.
